

## T-Mobile @Home service

T-Mobile customers can get unlimited nationwide calling from their home phone for just \$10/month.

T-Mobile @Home phone service allows customers to stay connected with those who matter most using their home phone. Customers benefit from unlimited nationwide calling at one low price – just \$10 per month – with a two-year service agreement and qualifying T-Mobile wireless rate plan.\*

By plugging their home phone into the T-Mobile @Home HiPort™ Wireless Router with Home Phone Connection and using their existing broadband connection, customers can now ditch their current home phone service, simplify their finances and lower their home phone bill by adding a home phone line to their T-Mobile service plan.

With T-Mobile @Home phone service, there's no additional charge for extra features such as caller ID, voicemail or call waiting. You can even keep your current home phone number for use with this service.

To use the service, customers need:

- A T-Mobile @Home service plan added to a qualifying T-Mobile wireless rate plan
- A T-Mobile @Home HiPort™ Wireless Router with Home Phone Connection
- A broadband Internet connection
- A touch-tone corded or cordless phone

### Pricing:

- For T-Mobile customers with a qualifying wireless rate plan, the @Home service is only \$10/month.
- T-Mobile @Home HiPort™ Wireless Router with Home Phone Connection is \$49.99 with new @Home service on a two-year contract.\*
- Customers can use their existing touch-tone home phones or purchase a new VTech cordless phone from T-Mobile for \$59.99.\*
